Top 5 Heat-Related OSHA Violations

And How to Fix Them Before They Cost You

The five heat-illness citations OSHA writes most frequently to manufacturing, warehousing, and outdoor-industrial employers — with the specific CFR reference and the corrective action for each.

What's Inside

- ✓ The heat-hazard General Duty Clause
- ✓ Written acclimatization protocols
- ✓ Water / rest / shade requirements
- ✓ Symptom recognition training
- ✓ Emergency response readiness
- ✓ Documented supervisor drills
- ✓ What a citation costs
- ✓ Same-week corrective actions

Identify → Document → Train → Verify

The Top 5 OSHA Violations Found in Triad Manufacturing & Warehouse Operations

And what they cost when an inspector finds them first.

These are the five violations GigLine identifies most consistently during walkthroughs of small-to-mid-size manufacturing, warehouse, and distribution operations across the Piedmont Triad. Each one is **citable, penalizable, and fixable**.

01

Hazard Communication — Lack of Written Program or Incomplete SDS Access

Citation: 29 CFR 1910.1200 (General Industry) / 29 CFR 1926.59 (Construction)

Penalty Range: \$1,190–\$16,131 per violation (serious); up to \$161,323 per instance (willful/repeat)

WHAT IT LOOKS LIKE No written HazCom program on file, chemical containers missing labels, or Safety Data Sheets not accessible to employees at the point of use.

FIX Written HazCom program, complete SDS binder or digital access at each work area, labeled containers.

02

Lockout/Tagout — Inadequate Energy Control Program

Citation: 29 CFR 1910.147

Penalty Range: \$1,190–\$16,131 per violation (serious); up to \$161,323 (willful/repeat)

WHAT IT LOOKS LIKE No written LOTO program, missing machine-specific procedures, employees not trained, or LOTO hardware not provided.

FIX Written energy control program with machine-specific procedures, annual inspections documented, employees trained and records on file.

03

Forklift / Powered Industrial Truck — Operator Training Not Documented

Citation: 29 CFR 1910.178(l)

Penalty Range: \$1,190–\$16,131 per operator per violation

WHAT IT LOOKS LIKE Operators running forklifts or pallet jacks with no training certification on file, no documented evaluation, or training records older than 3 years without refresher documentation.

FIX Formal operator training with written evaluation records, refresher training triggered by observed unsafe operation or near-miss incidents.

04

Walking & Working Surfaces — Floor Hazards and Housekeeping Deficiencies

Citation: 29 CFR 1910.22 / 29 CFR 1910.23

Penalty Range: \$1,190–\$16,131 per citation

WHAT IT LOOKS LIKE Cluttered aisles, unguarded floor openings or elevated work areas, slip hazards not addressed, or floor marking absent in pedestrian/vehicle shared zones.

FIX Written housekeeping program, defined aisle markings, guarding on floor openings, regular documented inspections.

05

Recordkeeping — OSHA 300 Log Not Maintained or Incomplete

Citation: 29 CFR 1904.7 / 29 CFR 1904.29

Penalty Range: \$1,190–\$16,131 per violation; each missing record can be cited separately

WHAT IT LOOKS LIKE OSHA 300 Log not started, incidents not recorded within 7 days, 300A Summary not posted February 1–April 30, or records not retained for 5 years.

FIX Active OSHA 300 Log, 301 incident reports for each recordable, annual 300A Summary posted and signed by company executive, 5-year retention file.
