Vince Lawrence — GigLine Safety & Compliance | OSHA 30-Hour Certified

| CODE  | DOCUMENT                | WHEN TO USE                     | SITUATION                           |                                 | ACTION                          |
|-------|-------------------------|---------------------------------|-------------------------------------|---------------------------------|---------------------------------|
| SS-00 | This Card               | Post at supervisor station      | Serious injury or fatality          |                                 | 911 first, then GigLine         |
| SS-01 | Welcome & Usage Guide   | Read first                      | OSHA arrives at your door           |                                 | Ask to wait — call now          |
|       |                         |                                 | Near-miss — could have been serious |                                 | Document, then call             |
| SS-02 | Chemical Inventory Log  | List every chemical on site     | Employee safety complaint           |                                 | Document it — call GigLine      |
| SS-03 | SDS Index               | Track SDS location per chemical | Condition you can't fix             |                                 | Do not guess — call first       |
| SS-04 | Written HazCom Program  | Required written safety program | Workers' comp claim filed           |                                 | Call before discussing          |
|       |                         |                                 |                                     |                                 |                                 |
| SS-05 | 30-Day Action Checklist | Implementation roadmap          | WHEN                                | ACTION                          | FORM                            |
|       |                         |                                 | Week 1                              | Inventory chemicals, find SDS   | SS-02, 03                       |
| SS-06 | One Phone Call Card     | Post at supervisor station      | Week 2                              | Complete written HazCom program | SS-04                           |
| SS-07 | If OSHA Shows Up        | Post near front entrance        |                                     | Week 3                          | Train employees, document names |
| SS-08 | Red Flag List           | Immediate-action conditions     | Week 4                              |                                 | Post notices, run inspection    |
| SS-09 | Monthly Inspection      | Complete monthly, retain 12 mo  |                                     | Monthly                         | Full safety inspection          |
| SS-10 | Training Record Log     | Document every training session | As needed                           |                                 | Red flag conditions             |
|       |                         |                                 |                                     |                                 |                                 |

This system was built for the person responsible for safety when no one else is watching. Every document maps directly to an OSHA standard. Use it consistently and you will be prepared for any inspection, incident, or audit.

*Wisdom sees ahead and prepares for what's coming. — Proverbs 27:12*
