

Facility / Location: Main Production Floor
Supervisor Name: J. Carter

Month / Year: July 2026
Reviewed by: M. Reynolds

Supervisor Instruction

This completed example shows how to document safety findings after an inspection. Every finding should have a clear issue description, risk level, assigned owner, due date, status, and verification step before it is considered closed.

Risk Level: H = High M = Medium L = Low
Status: Open | In Progress | Closed

#	Date	Area / Location	Finding / Issue	Risk	Owner	Due Date	Status	Verified By	Notes / Verification
1	07/10/26	Electrical Room	Pallet stored in front of electrical panel.	H	Maintenance Lead	07/12/26	Closed	J. Carter	Pallet removed. Panel access verified clear.
2	07/10/26	Wash Station	Unlabeled spray bottle found in active use.	M	Shift Supervisor	07/11/26	Closed	J. Carter	Bottle removed from use. Replacement container labeled.
3	07/10/26	Paint Cabinet	Spray paint SDS missing from binder.	M	Safety Coordinator	07/17/26	Open		SDS requested from supplier. Pending verification.
4	07/10/26	Fuel Storage	Diesel fuel SDS missing from binder.	M	Safety Coordinator	07/17/26	In Progress		Supplier contacted. Add SDS before HazCom training is closed.
5	07/10/26	Press Line	Scrap material accumulated near pedestrian walkway.	M	Production Supervisor	07/12/26	Closed	J. Carter	Scrap removed. Walkway cleared and marked.
6	07/10/26	Maintenance Cart	Aerosol chemicals stored without confirmed SDS review.	L	Maintenance Lead	07/15/26	Open		Review SDS Index and update storage list.

Example Note

A finding is not closed when someone says it was fixed. It is closed when the correction is verified, the record is updated, and the responsible person can explain what changed.
