

Your Path Forward

You have the Supervisor Safety OS in place. The next step is applying it to your actual facility, records, and risk areas. GigLine Safety & Compliance can help review what you have, identify documentation gaps, and recommend practical next steps.

Choose the Review Option That Fits Your Facility

Option 1 — Local On-Site Review

For facilities in the Triad and surrounding North Carolina service area.

Includes:

- Facility safety walkthrough
- Supervisor documentation review
- Chemical inventory and SDS review
- Inspection and corrective action review
- Written findings summary
- Practical next-step recommendations

Best for:

Facilities that want fresh eyes on the floor and their safety records.

Option 2 — Remote Documentation Review

For facilities outside the local service area or teams that want their safety documents reviewed before an audit, inspection, insurance request, or internal safety meeting.

Includes:

- Chemical Inventory Log review
- SDS Index review
- Written HazCom Program review
- Monthly inspection checklist review
- Corrective Action Log review
- Written gap summary
- Follow-up recommendations

Best for:

Facilities that need help reviewing their safety paperwork, even if an on-site visit is not available.

Important Notice

A GigLine review is designed to support practical safety documentation and hazard follow-up. It does not replace legal advice, OSHA consultation, or a full facility-specific compliance determination. Employers remain responsible for identifying applicable standards, correcting hazards, training employees, and maintaining accurate records.
