
THE 26 QUESTIONS WE GET MOST · EDITION 2026

Straight answers about OSHA safety walkthroughs.

What HR managers, plant managers, and small-operation owners ask before they book — answered without consultant fluff.

Vince Lawrence · OSHA 30-Hour Certified · 25+ Years in Manufacturing, Fleet & Warehouse Safety

THE 26 QUESTIONS WE GET MOST

Frequently Asked Questions

A curated 26-question deck for HR managers, plant managers, and operations leaders evaluating a GigLine engagement. Every answer is current as of February 2026 and mirrors the language used on giglinecompliance.com.

01. How much does an OSHA safety walkthrough cost in North Carolina?

GigLine safety walkthroughs start at \$1,200. Price is scoped based on square footage, machine count, employee count, and hazard complexity. Fixed quote before scheduling. No hourly billing, no retainer, no surprise invoice. For context: a single OSHA serious violation can cost up to \$16,550 per citation (2026 adjusted rate). The walkthrough identifies what may be reviewed before an inspector does.

02. What does an OSHA safety consultant do on-site?

During a GigLine Safety Walkthrough, Vince Lawrence — OSHA 30-Hour Certified safety compliance consultant based in Kernersville, NC — walks every area of your facility. He photographs findings, documents each one against the applicable CFR standard, and provides an estimated penalty exposure based on OSHA published maximums. Within 48 hours you receive a written report with photo documentation, CFR citations, and a prioritized list of corrective actions. The engagement is private — findings are not shared, published, or referenced without written permission.

03. How do I prepare for an OSHA inspection in a small manufacturing plant?

The most effective preparation is a third-party walkthrough before OSHA arrives. OSHA inspections are triggered by employee complaints, referrals, fatalities, or programmed inspections — they do not announce in advance. A GigLine Safety Walkthrough gives you a written report of the conditions an inspector may review, documented against the same standards OSHA uses. The walkthrough starts at \$1,200.

04. What is a Compliance Readiness Visit?

GigLine's most complete single engagement. Combines the Safety Walkthrough and Documentation Review in one on-site visit. One consolidated written report covers both physical findings and documentation gaps, with a prioritized corrective action plan. Starts at \$2,000. Booking the two services separately starts at \$2,500.

05. What is the difference between a Safety Walkthrough and a Compliance Readiness Visit?

The Safety Walkthrough covers the physical floor — starts at \$1,200, report within 48 hours. The CRV adds a full documentation review to the same visit — written programs, training records, HazCom binder, OSHA 300 log — starts at \$2,000. If unsure, the walkthrough is the lower-barrier starting point.

06. What's included in a GigLine safety walkthrough?

A GigLine safety walkthrough includes a 1–3-hour on-site review, photo-documented safety observations, OSHA-related references where applicable, and a written "Top 10 Fixes" report delivered within 48 hours. Findings are color-coded: RED for urgent items, AMBER for near-term corrections, and GREEN for what your team is doing well.

07. How long does a safety walkthrough take on-site?

Most walkthroughs take 1 to 3 hours on-site. A small shop under 10,000 sq ft may take less than an hour. Larger warehouses, production floors, or multi-area operations may take 2 to 3 hours or require a larger scoped visit. You will receive a time estimate before the visit.

08. What's the difference between a safety walkthrough and an OSHA inspection?

An OSHA inspection is performed by a federal or state compliance officer and may result in citations, penalties, and required abatement. A GigLine safety walkthrough is a private, voluntary review performed by an independent consultant. Findings are delivered only to you — nothing is reported to OSHA, your insurance carrier, or any third party.

09. Do I need a written HazCom program if I have fewer than 10 employees?

In most cases, yes. Under OSHA 29 CFR 1910.1200, employers with hazardous chemicals in the workplace must maintain a written Hazard Communication program, regardless of headcount. Exceptions are limited and generally apply only to sealed consumer-packaged products used in the same way a household consumer would use them.

10. What areas of North Carolina does GigLine serve?

GigLine is based in Kernersville, NC and serves the Piedmont Triad, including Winston-Salem, Greensboro, High Point, Burlington, Lexington, Thomasville, Salisbury, and surrounding communities. Most on-site work is scheduled within roughly 60 miles of Winston-Salem. Charlotte and Raleigh metro engagements may be considered based on scope and travel.

11. Will GigLine report findings to OSHA?

No. GigLine engagements are private. The written report is delivered to the client only. GigLine does not contact OSHA, your insurance carrier, or any regulatory agency as part of a standard walkthrough or documentation review.

12. How fast do I get my walkthrough report?

Reports are typically delivered within 48 hours of the on-site visit. The report is provided as a PDF and may include photos, OSHA-related references where applicable, and prioritized corrective action recommendations. Many clients receive the report by the next business day.

13. What is a "Top 10 Fixes" report?

The GigLine deliverable for a safety walkthrough. It ranks the ten most important findings from your on-site visit — RED for urgent, AMBER for near-term, GREEN for what your team is doing well. Each item includes what was observed, why it matters, the OSHA-related reference, and a recommended corrective action.

14. Can I see a sample safety walkthrough report before I book?

Yes. Email vince@giglinecompliance.com or call (336) 329-8899 and request a sanitized sample. Sensitive client details are redacted, but the structure, depth, and OSHA references are identical to what you will receive.

15. What industries does GigLine typically work with?

Small manufacturers, warehouses, distribution centers, fleet operations, general contractors, and specialty trades. Most clients have 5 to 100 employees. The common thread is operations that do not have a full-time safety manager.

16. Is Vince Lawrence OSHA certified?

Vince Lawrence is OSHA 30-Hour Certified in General Industry and has 25+ years of hands-on experience in manufacturing, fleet, and warehouse safety. He is also a U.S. Navy veteran. GigLine is owner-operated — every walkthrough and report is performed personally by Vince.

17. What happens if OSHA shows up after my walkthrough?

You have the written record of every hazard identified, every corrective action taken, and every training record reviewed. A documented corrective-action log may help show good-faith effort, which can matter during an OSHA inspection. Documentation is the single biggest factor in how an OSHA visit goes.

18. Do you offer follow-up walkthroughs for past clients?

Yes. Follow-up walkthroughs for past clients are offered at a reduced rate. Ongoing support is also available through Quarterly Compliance Maintenance (\$950/quarter) and the Annual Compliance Control Partner program (\$12,000/year — \$1,000/month equivalent), which includes two walkthroughs, four documentation reviews, quarterly review calls, and direct on-call access between visits.

19. How should I prepare for a safety walkthrough?

Nothing special. Do not stage, clean up, or hide anything — the walkthrough is most valuable when the floor looks the way it normally does. Have your written safety programs, SDS binder, and training records accessible. A brief floor manager or supervisor introduction at the start helps.

20. How do I book a safety walkthrough with GigLine?

Visit giglinecompliance.com/intake and fill the four-field form, or call (336) 329-8899 directly. You'll hear back within one business day with scheduling options and a confirmed price.

21. What's actually delivered in a Compliance Readiness Visit?

The Compliance Readiness Visit (from \$2,000) is GigLine's most-requested engagement. You receive: (1) a full on-site walkthrough of production floor, storage, chemical areas, and egress routes — 2 to 4 hours depending on facility size; (2) a structured review of written safety programs, training records, OSHA 300/300A/301 logs, inspection records, and SDS inventory using a 53-item checklist across 7 OSHA categories; (3) an 18-page CFR-cited audit report within 48 hours; (4) a single compliance percentage score for floor and files combined; (5) a 90-day remediation tracker pre-populated and ready to assign to supervisors; (6) a 'What to Say If OSHA Calls' guidance sheet; and (7) a 30-day check-in call. Fixed quote. Private engagement. No retainer.

22. Who is the Annual Compliance Control Partner program designed for?

The Annual Compliance Control Partner (\$12,000/year — \$1,000/month equivalent) is designed for operations that want a compliance partner they can call — not just a one-time report. Best fit: facilities with 25+ employees, multiple shifts, or recurring customer-audit requirements where OSHA exposure is ongoing. Includes two full Safety Walkthroughs per year, four Documentation Reviews per year, four Quarterly Review Calls (30 minutes each), OSHA 300A posting reminders, a pre-inspection readiness review, on-call access between visits, and an annual written management safety review.

23. Can GigLine write the safety programs we are missing?

Yes. The Document Development service writes the written programs your operation is missing or that the OSHA Documentation Readiness Review flagged as insufficient. Most-requested programs: Lockout/Tagout (LOTO) with machine-specific procedures, Hazard Communication (HazCom), PPE Hazard Assessment, and Emergency Action Plan (EAP). Pricing is fixed-quote, scoped to your actual gap list. A single program starts at \$350, LOTO with up to five machine-specific procedures starts at \$650, and a full written program suite (5+ programs) starts at \$2,000.

24. How does Quarterly Compliance Maintenance work?

Quarterly Compliance Maintenance (\$950/quarter) keeps the safety system current between annual walkthroughs. Each quarter GigLine performs a documentation review (training records, OSHA 300 log, written program review, SDS inventory check), a corrective action tracker review, and a brief site visit if any changes warrant one. The quarterly cadence keeps small documentation gaps from becoming citation-level exposures.

25. Should I fix everything before you come?

No. Showing GigLine a sanitized version of the operation defeats the purpose. The walkthrough is built to surface what your team has stopped seeing — the pallet in the pedestrian lane, the unlabeled spray bottle, the SDS that nobody can find under pressure. Cleaning up beforehand hides exactly the issues you are paying to identify. If something is unsafe enough to be an immediate injury risk, fix it first — otherwise let the floor speak for itself.

26. Can you help after an incident but before OSHA contacts us?

Yes. Post-incident, pre-inspection support is one of the most time-sensitive engagements GigLine handles. After a recordable injury, near-miss, or employee complaint, there is typically a window before OSHA, the insurance carrier, or a customer auditor follows up. A walkthrough during that window helps document the corrective action path, identify any related exposures the incident surfaced, and produce a written record showing the operation took the issue seriously. Call (336) 329-8899 directly if the situation is time-critical — same-week scheduling can usually be accommodated.

Ready to schedule a walkthrough?

One on-site visit. A written report within 48 hours. Starting at \$1,200. Call (336) 329-8899 or visit giglinecompliance.com/intake.
